PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with over **25 years of experience** in software development, working on **large-scale enterprise projects**, **legacy system modernization**, and the development of **scalable web applications**. Strong expertise in **React (Hooks, Context API, state management)**, **JavaScript (ES6+)**, and **TypeScript**, with a strong focus on **UX/UI**, **performance optimization**, **security**, and **REST API consumption**.

Solid experience in **cloud environments**, especially **Microsoft Azure**, with deep integration into **Azure DevOps**, **Git version control**, and **CI/CD pipelines**. Extensive experience working in **distributed teams**, **multi-tenant platforms**, and **modern architectures**, including **Micro Frontends**. Hands-on professional with a strong architectural mindset and high alignment with enterprise standards.

CORE COMPETENCIES

- React (Hooks, Context API, State Management)
- JavaScript (ES6+) & TypeScript
- Node Js / Nest Js
- Sql databases like Postgres, Sql Server, MySql and No-Sql like DynamoDB, MongoDB and Redis
- HTML5, CSS3, Responsive Design & UX/UI
- REST API Integration and Consumption
- Legacy System Migration & Modernization
- Azure DevOps & CI/CD Pipelines
- Git Version Control (GitFlow)
- Scalable & Multi-Tenant Systems
- Payment Gateway Integration

- Frontend Performance & Security
 - High-Performance Software Engineering
-

TECHNICAL SKILLS

AI & Cloud Platforms

- Microsoft Azure (Azure ML Studio, Azure AI Studio, Azure Cognitive Services: Computer Vision, Form Recognizer, Language Service, Speech)
- AWS (SageMaker, Lambda, EC2)
- Google Cloud Platform (Vertex AI, BigQuery)
- Azure Databricks
- Snowflake (TypeScript)

Frontend Technologies

- React.js
- Next.js
- JavaScript / TypeScript
- TSX
- Tailwind CSS
- Redux

DevOps & Containers

- Docker
- Kubernetes
- Azure DevOps

Testing

- Frontend Testing
- TensorFlow (Frontend experimentation)
- Jest
- Cypress

Programming Languages

- Python
- Golang
- SQL
- Bash
- JavaScript
- TypeScript
- Node.js

Web Frameworks & APIs

- FastAPI
- Flask
- Django
- Next.js

Messaging & Data Integration

- RabbitMQ (REST API & AMQP Protocol)
 - ETL Pipeline Development
 - Apache Airflow
-

LANGUAGES

- **English:** C1 – Advanced / Fluent
-

PROFESSIONAL EXPERIENCE

Lucas Technology Services – New York City, USA

Senior Full-Stack Software Engineer

January 2016 – Present

- Developed and evolved enterprise web applications using **React, Next.js, JavaScript (ES6+), and TypeScript**.
 - Provided **technical leadership** in legacy system modernization projects, migrating outdated interfaces to modern **React-based architectures**.
 - Implemented **UX/UI best practices**, responsive design, and accessibility standards.
 - Integrated and consumed **REST APIs** in highly complex enterprise environments.
 - Created and maintained **CI/CD pipelines in Azure DevOps**, ensuring code quality, version control, and continuous delivery.
 - Worked extensively in **Azure cloud environments**, integrating frontend applications with backend services and corporate platforms.
 - Participated in **Micro Frontend architectures**, improving scalability and team autonomy.
 - Applied **security and performance optimization practices**, including rendering optimization, code splitting, and lazy loading.
 - Collaborated with **globally distributed teams**, following enterprise standards and agile methodologies.
-

KEY DIFFERENTIATORS

- Strong expertise in **React** and modern frontend development
 - Hands-on experience with **Azure DevOps** and **Azure Cloud**
 - Proven track record in **legacy system migration**
 - Extensive experience in **large enterprise environments**
-

EDUCATION

Stanford University

Bachelor's Degree in Software Analysis & Development

Completed: 2011

Stanford University

BMA in Technology Businesses (Postgraduate)

Completed: 2014
